

Lab Policy & Outline - CSE350 Summer 2026

- ★ All the policies are subject to change depending on the decision of the faculties.
- ★ Any kind of plagiarism will result in severe punishment.

Marks Distribution

Class Performance	Lab Report	Lab Test	Project	Total
6	3	8	8	25

Attendance Policy

- Attendance will be counted in the following 3 categories:
 - **Attendance of 90% is mandatory** for the Lab Final exam.
 - Present (**P**) / Absent (**A**) / Late (**L**).
 - **2 Late attendances = 1 Absent.**
 - If you arrive at the labroom after the attendance has already been taken, you will be considered as **Late**. Attendance will be taken before the lecture starts. If someone misses the entire lecture and then arrives, he/she will be considered **absent** irrespective of whether he/she continues the remaining lab tasks. Without any legitimate reason, a make up lab will not be allowed in such cases.
 - Absences might be considered for those who have **relevant documents** (e.g. medical reports) but you will **not get class performance marks**.
- Lab performance marks will be awarded based on the performance of the group.
 - For late attendance (L), lab performance marks will be half ($\frac{1}{2}$) for that experiment.
 - If a student remains absent from a certain experiment **and provides a valid reason for their absence**, he/she can do the makeup lab with another section and get the **class performance marks** for that particular experiment. To do so, he/she has to get permission from the faculties of that lab section.

Group

- There will be **3 students per group (Except 3 groups with 4 students)**.
- You will be assigned a group number at the beginning of the first lab. Please **remember that group number** because that will be your group number for the entire semester.

Class Performance

- There will be **five class performances** throughout the semester (**For five experiments**)
- You will be **marked out of 10** based on how fast or accurately you have **completed** the experiments in the lab.
- Here “**Completed**” will be counted only when faculty have signed the datasheet of the experiment.

Lab Report

- **At least one student from each group (maximum two reports per group per experiment)** should submit the lab report for each experiment. At the end of the semester, each student must have submitted **exactly two reports** in total.
- If you submit more than **two reports throughout the semester**, we will consider only the **first two**.
- Apart from submitting the hard copy in the lab room, you **MUST** submit the **softcopy of the report in a google form** within the given deadline (usually 1 week after completing the experiment)
- Faculties can give appropriate penalties (**ranging from reduced marks to negative marks**) based on the level of plagiarism (if found).

Lab Test

- **One** hardware lab test will be held.
- **Lab test** will be based on **experiments 1,2 and 3**.
- Lab tests will be **individual**.
- Attending the lab test is **mandatory** to get a passing grade in the lab.

Project

- Mark distribution:

Idea	Project Demo-I	Project Final Demonstration	Viva (Individual)	Report	Total
2 (Bonus)	4	3	5	4	16

- Project will be group-wise.
- You will be assigned a project from your lab faculty members in the first class. You may suggest an idea of your own in the next class if you are unwilling to work on the idea assigned to you, for which you will get a 2 mark bonus if the idea is accepted by your lab faculties.
- Implement the hardware project. You can buy the required components [online](#).
- Arduino based projects are not allowed.
- You have to showcase the project on the designated date and prepare a report (1 to 2 pages, *IEEE* format with abstract, implementation, conclusion - preferably in [LaTeX](#))
